What do we produce?

- Abrasive sheets, discs and rolls
- Abrasive wide belts, narrow belts and mini belts
- Abrasive segmented belts
- Abrasive Non-wovens
- Micro finishing discs
- Flapdiscs, minidisks
- Polishing Compounds and Polishes

Dustless Sanding

- We provide industrial solutions for different markets.
- We improve workers health and working area conditions.
- We are working to achieve higher productivity in surface preparation processes of our customers.

METAL

The metal sector is a sector where abrasive products are used the most and the quality of the products is very important.

Our company offers the best suitable abrasives needed by the metal industry in the most economical way and with superior quality .

We perfectly respond to the needs of the sector to create surfaces at high quality standards with innovative products we produce.

COMPOSITES

Composite industry and composite products have shown great development in recent years. The product range and the sectors covered have increased. The composite industry has a wide variety of needs for abrasive and polishing products.

As in all sectors, we develop products for the needs of the composite industry together with our customers in line with customer needs.

In order to achieve this in the most accurate way, we examine the production processes of our customers, and try the solutions we have developed in line with our findings as a result of our examination, first in our own training center, and present the most successful solutions to our customers.

WOOD

We offer products and solutions for the wood industry, starting from coarse sanding, suitable for all sanding stages, as well as meeting polishing requirements.

In addition to having the capacity to produce products for all kinds of wood industry needs, our company can also offer tailor-made solutions to the special needs of our customers.

AUTOMOTIVE REPAIR

Today, it has become very important to repair vehicles in the fastest and perfect way. Our company develops and manufactures its products for auto repair to meet this need.

We benefit your business with our sanding machines and abrasives, which we have specially developed for the automotive repair industry, which enable fast and perfect leveling on putty surfaces and achieving a superior surface before painting.

Our aim in all sectors is to develop products and technologies that will help our customers achieve competitiveness in their business, and that will make a difference for them economically and in their sectors compared to their competitors.

CONSTRUCTION & DECORATION

We have products suitable for both machine and hand use for wall sanding. With our dust extraction system, which will allow you to sand without dust, you can easily and cleanly do your sanding work even in living environments.

Our company also produces disc and belt abrasives and sponge backing products for parquet sanding.

MARINE

Boat production and repair sectors are one of the leading sectors where abrasive and polishing products are used with a wide variety and high quality need.

Our company has a wide range of products for this sector and the capacity to produce quality products to meet its needs.

Due to the nature of the industry, the abundance of boat types produced by the industry necessitates the diversification and differentiation of abrasive and polishing products.

Our company develops and produces products of various types and quality that will meet all the needs of the sector.

AUTOMOTIVE OEM

We aim to provide the products and services that our automotive main industry and sub-industry customers need in the fastest, most economical way and with constant quality standards.

In today's conditions, where the expectations of automobile users are increasing day by day and the competition is at the highest level, we both develop the most sensitive surface treatment solutions for the automotive manufacturing sector and offer the products and services we have created to the benefit of the sector in a timely, stable and error-free manner.

Thanks to our technical staff that can respond to the needs and demands of our customers in the fastest and most accurate way, our flexible and high production capacity and our experience of more than thirty years in the sector, we provide benefits to the main industry and sub-industry companies.

Focused Service Principle

- Our main target is to be a solution partner for our customers.
- We can meet customer needs thanks to our flexible production capability.
- Our priority is error-free and just-in-time delivery in product supply.
